

Efficient Logistics Key

The background and basis in BIA is logistics. From shipping, trucking, airfreight, warehousing, distribution, port handling etc. including special transports that require engineering. We believe that cargo flows efficiency is the key and basis for long term trade relations. In BIA we bring this expertise as an extra added value to assist trade and investment development.

Ideas – Innovation - Technology

In our team we understand the challenges that business developer faces, including budgeting, systematic yet pragmatic operations . BIA will keep you informed on potential risks and challenges so that you can manage your risk and expectations.

Regular Meetings Virtual or Live.

Of course live events are what we are used to and feel most comfortable with. The experiences in virtual meetings and video conferences has shown the advantages of this medium. In future these virtual meetings will remain an important part of our activities.

BIA basis of members and their board is of vital importance. We are keen to discuss and find out if and what BIA can bring to add value for companies.

For Indonesian businesses who wish to explore the Benelux- European market, we have great services to offer.

For BeNeLux companies, starting or already operating in the Indonesian market; we are the team to check out for neutral assistance & support.
